LODI SMELTER IS FIRST-CLASS PLANT

Will Be Put in Regular Commission During Early Spring Months.

SALT LAKE CAPITAL INTERESTED IN DISTRICT

Operating Company Has Purchased Lead Mine for Fluxing.

The smelter which was erected at Lodi last year by the Lodi Mines company, owner of the old Illinois mine, a heavy producer in the past, is pronounced by experts as being one of the most perfect plants in the country, according to J. A. George, a well-known operator of

d. A. George, a well-known operator of that camp.

This will mean much to a large number of Salt Lake people who are directly interested in the district and whose properties, as a result of the nearness of the new smelling facilities, will greatly increase in value. The plant, however, is not in operation at present, though faults which were encountered in the ores treated are being overcome by the management so that work will very probably be resumed in the near future.

Concerning the new plant and its future, the Miner, Tonopah, says. The plant was operated six weeks, producing bullion worth about \$100,000, when it was closed down, not on account of any fault of the smelter, but for the reason that the metallurgist who had made the tests of the ores upon which it was to work made a slight miscalculation.

"The metallurgist reported as a result of his tests that the ores of the Illinois and neighboring mines contained sufficient lead to make them self-fluxing. This proved to be a mistake. Pig lead had to be imported, to be used as a flux and that expense, added to the high cost of coke, rendered it impracticable to operate the smelter under existing conditions.

Salt Lake Interests.

Salt Lake Interests.

Salt Lake Interests.

"As seen as the situation became clear, In. C. I. Burt, the company's manager, closed the smelter and went in quest of a supply of lead ore. Just across the valley, only five miles from the smelter, he found a most promising lead prospect. He purchased the prospect on his own account and proceeded to develop it. Results have been so satisfactory that the lead mine has been turned over to the Lodi Mines company, it is said, and preparations are being made to reopen the smelter in the spring.

"So sanguine of success is the company that it has apportioned the sum of \$100,000 for the further development of the Illinois nine, the intention being to construct a large vertical shaft to superseet the old inclined shaft in the property.

That the district will be able to pro-"That the district will be able to provide a very much larger tonnage of ore than the smelter at present capacity will be capable of handling. Mr. George declares there is no doubt. In the Illinois mine lias been developed to the depth of about 900 feet great bodies of relatively high-grade ore, while exploratory work in the neighboring properties proves that there is a large district throughout where like conditions prevail.

Rought Lead Mine Opohongo . Plutus Prince Con. Rich, and Anaconda

there is a large district throughout where like conditions prevail.

Bought Lead Mine.

In the property of the Lodi Gold and Copper company, which is controlled by Salt tasks people, has been opened on the 160-foot level nine feet of ore which Mr. theorge says runs from 30 ounces to 100 ounces in silver, 13 per cent copper 5 per cent leps and 57 a ton in gold. The orthre leeds as it is broken down will adverage he says, not less than \$3 a ton the office of the character, so far from railroad, is not commercial ore, but with a smelter in the district if should prove a bonanza. This ore body was concountered in great limestone fissure, which varies from 35 feet to 125 feet in width, and which is traceable on the surface for 5006 feet, it extends not only through the Lodi Gold and Silver company group, but through the Lucky Girl group, adjoining, which is likewise owned by the Salt Lake crowd, and in which similar ore shewings have been made. The fissure lies between pophyry and garnet granite. Parallel veins of ore, some of ivery high grande, are found in the limestone. The veins cross one another at feetquent intervals, and the richest of the ore is found at the intersections. Mr. frequent intervals, and the richest of the ore is found at the intersections. Mr. George regards it as one of the most promising ore countries he has ever

PRODUCERS' REPORT WITHOUT ANY FEATURE DEVELOP EXTENSIVELY HIGHLY SATISFACTORY

Business Light and Prices Promise of Smelter Stimulating Curtailed Production Now Rec-Interest Among Property Owners.

> The information brought from the east ast week by Manager Gunn of the Mason Valley property to the effect that plans for the financing of the erection of the proposed smelter for the handling of Mason Valley and custom ores had been finally rounded out, and that work on the plant would be started in a comparatively short time, has already had the effect of limbering up operations in the Mason district to a considerable extent. It is probable that the working forces at the Mason Valley mine proper will be materially increased in order to propure for the regular and heavy production which the new smelter will require of it and other operators in the district also will have in the nearby smelter an incentive to operate and develop more extensively. One of the properties in the district which is opening up in good shape is that controlled by the Native Copper Mining company, the claims being located about one mile north of Mason, and advices from camp are to the effect that the mine management will be among the first to offer its ores to the new smelter. Some \$15,000 it is said, has already been spent in the development of the Native Copper ground and the showings are such as to warrant the belief that the mine will be able in the near future to supply a considerable tonnage of smelting ores.
>
> Local officials of the Mason Valley company state that the only circumstance which may in the least retard the early completion of the proposed smelter will be a probable delay in getting the required steel on the ground in sufficient quantities to keep the contractors engaged. The steel proposition seems to be quite a serious one of late, builders generally reporting that it is difficult for the manufacturers to keep their orders filled. However, all possible headway will be made in getting the Mason plant started and completed. district to a considerable extent. It is probable that the working forces at the

on the recent report filed by the Copper Producers' association, compiled by the News Bureau:

"The statement of the Copper Producers' association covering the movement of the metal in and out of demestic refinerles for the month of January is the most extraordinary yet issued by that organization. It is notable for the following reasons:

"First—A record-breaking decrease of 43,300,000 pounds in the American surplus.

45,300,000 pounds in the American surplus.

"Second—Unprecedented totals covering both the shipments abroad and the deliveries to domestic consumers. Exports at \$1,600,000 pounds are larger by almost 6,000,000 than any month before or since the Producers' association came into existence, while the domestic deliveries at 75,000,000 pounds are almost 3,000,000 pounds are almost 3,000,000 pounds are almost 3,000,000 pounds are almost 3,000,000 pounds above the previous high total made in July last

"Third—The surplus in this country is actually 24,000,000 pounds less than on January 1, 1902.

"Fourth—Taking due account of the 2,800,000-pound increase in foreign yisl-ble supply during January, the world's surplus shows a net reduction for that month of 39,500,000 pounds.

"Fifth—The failure of the January production to show the heavy reduction from previous months which had been anticipated.

"This statement, showing the extraor—

previous months which had been anticipated.

Thits statement, showing the extraordinary reduction in American stocks, is a natural reflection of the large November and December saises in this country, amounting to 300,000,000 pounds, and which were made to consumers covering advanced deliveries at a time when there was much talk of a gigantic copper combination among the producers.

Paced Deliveries

Record Deliveries.

Bination among the producers.

Record Deliveries.

"Of rourse, it is too much to expect the maintenance of any such extraordinary shipments to American manufacturers as well as to foreign shores as were made last month. These totals greatly exceed any previous shipments heretofore made and represent, so far as the domestic consumers are concerned, some stocking up for consumption during the first three or four months of this year. It is quite probable that the January total of almost 160,000,000 pounds, delivered to home manufacturers and exported to foreign shores, will stand as a record for many months to come.

"All of the big copper people expected that there would be a big reduction in the American surplus, but they had reckoned that this reduction would be brought about through a heavy shrinkage in the January refinery output by reason of the November and December curtailment among the western mines; but, strange to say, the January production was only about 1,000,000 pounds less than that for December.

"For a month or two, at least, the statements of the Copper Producers' association will be favorably affected by a smaller production than has recently prevailed. This curtailment has been in large degree forced by reason of extreme weather conditions in the west, but there is also a disposition on the part of many of the large producers to ease up in their anxiety to push their plants to the limit. They have come to a full resognition of the January production to a full resognition of the fact that there can be no substantial betterment in copper conditions unless one and all contribute toward some restriction in the amount of copper now coming out of the ground.

"A year ago the January production amounted to 112 135,290 pounds, and de-

und.
A year ago the January production ounted to 112.135.290 pounds, and desires were 99.362,421, making the sursifor that month 21.772,779 pounds. The ent. report's deficit of 43.592,775 plus for that month 21,72,73 pounds. The recent report's deficit of 43,502,772 pounds shows that, as compared with January a year ago, last month represents an improvement of no less than 63,-075,551 pounds."

TINTIC COMBINATION TO RESUME MONDAY NEXT

B. H. Bullock manager of the Tintic Combination Mining company, came in from Provo Tuesday and reported that everything is now in readiness to resume work on the property of the Tintic Combination at Eureka, and that active operations will be commenced on Monday next and continued with renewed vigor. It is the intention to build a station on the 200-foot level and from there drift east to catch the vein known as the Golden Treasure or more generas the Golden Treasure or more generally known as the Aspinwall vein, which is estimated to be about 100 feet from the proposed station. This property is very popular in the district and much is expected from it in the near future.

Nevadas in San Francisco.

PIONEER GOLD MINER OF COLORADO IS DEAD

James H. Pierce, to whom is credited in first discovery of gold in Colorado, is ead at the home of his daughter in Den-

Curtailed Production Now Recognized as Necessary to Industry.

Students of the copper game, who are anxiously awaiting the time when the market price of the red metal will advance, a condition which will come, it is believed, when the great surpluses on hand are sufficiently reduced and the production better regulated will find food for thought in the following summary on the recent report filed by the Copper Producers' association, compiled by the News Bureau.

The statement of the Copper Producers' association overring the movement of the west in and out of domestic response to the place where Pueblo now stands and went north past Pike's peak to Cherry croek. They reached the present sile of Denver on June 24, 1858. They prospected along Ralson croek and discovered the first gold known to have been found in Colorado at the mouth of Dry creek, near where Englewood now is been found in Colorado at the mouth of Dry creek, near where Englewood now is went to Colorado in '38. He was a member of the Society of Colorado Pioneers and is survived by his wife and four that state.

Heart failure was the cause of death, the victim having been found dead in a bathroom at his place of residence.

PFLUG LEAVES EMPLOY OF BINGHAM MINES

J. F. Pflug, who has been for some time in the employ of the Ringham Mines company as cashier and purchasing agent, has severed his connection with that corporation and will hereafter branch out for himself as a certified public accountant. Mr. Pflug recently passed the examination covering such work with high honors and being a young man of recognized natural ability, industrious and reliable in every way, he will doubtless meet with splendid success in his new undertaking. Mr. Pflug has made hosts of friends during his connection with the mining industry, and the best wishes of all are extended him in his present venture.

MEET ON SATURDAY

A meeting of the Utah branch of the American Mining congress will be held at the Commercial club in this city on Saturday, February 19, at 8 o'clock p. m. The meeting is called for the purpose of electing three directors for three years, to fill the vacancles caused by the expiration of the terms of John Dern, David Keith and Duncan MacVichie, whose terms of office expired on November 5, 1909.

NOTICE OF SPECIAL STOCKHOLD-ERS' MEETING.

A special meeting of the stockholders of the Red Metal Mining company, a corporation of Utah, has been called and will be held at the office of the company, to wit, the office of C. L. Rood, Mackintosh building, corner Second South and West Temple streets, Salt Lake City, Utah, on Thursday, February 24, 1910, at 12 o'clock noon, to consider and vote on the proposition of amending the articles of incorporation by decreasing the par value of all the authorized capital stock to 16 cents per share and amending article VII of said articles of incorporation so that same, as amended, will read as follows:

"ARTICLE VII.

"ARTICLE VII.
"The capitalization of this company shall be and is fixed at \$100,000, and the amount of each share of stock at the par or face value shall be and is fixed at 10 cents, and the limit of capital stock shall be and is fixed at 1.000,000 shares of the denomination and par value of 10 cents each."

shall be and is fixed at 1.000,000 shares of the denomination and par value of 10 cents each."

And of further considering and voting on the proposition to sell, assign, transfer and convey all the property of this corporation to a new corporation to be organized under the laws of Utah with a rapital of \$100,000, represented by 1,060,000 shares of the par value of 10 cents each, and all shares in such new corporation to be assessable, and the stockholders of this company to receive stock in such new corporation on the basis of one share of stock of the new corporation for each one share of stock of the present corporation held by such stockholders.

And for the purpose of transacting all business properly or necessarily incidental to the foregoing matters.

By order of the board of directors.
